PREFACE

Reference works too often present an austere, depersonalized facade. Although one knows that they are man-made, one feels far removed from the people who labor behind the scenes to make them possible. The literature analysts and others who prepare the *Index Medicus*® today are the intellectual descendants of a brilliant and imaginative individual who conceived of a comprehensive index when none existed, and of his successors who carried on the work in spite of frequent adversities.

The first volume of *Index Medicus* was published in 1879, but the story leading up to that event began in 1865, when Dr. John Shaw Billings, a surgeon in the Civil War, was assigned to the office of the Surgeon General of the Army. Among other duties, he was given responsibility for the Surgeon General's small medical library. Perceiving that there were few if any libraries in the country holding a substantial proportion of the medical literature, Billings set about a program of expansion. Within eight years, he had built a collection of 1,800 volumes into one containing over 50,000 volumes and pamphlets. Because there was then no comprehensive medical index, he proceeded with plans to publish a catalog of the library, and a periodical index to the current literature.

John Shaw Billings, M.D.

Undaunted when public funds were not authorized for the latter purpose, he found a publisher who would assume the entrepreneurial risk, some physicians to subsidize the project, and he contributed his own time, outside of duty hours, to the selection of the articles to be indexed.

"Few words are required to demonstrate the utility of the projected serial," wrote the editors in their introduction to Volume 1. "The practitioner will find the titles of parallels for his anomalous cases . . . and the latest methods in therapeutics. The teacher will observe what is being written or taught by the masters of his art in all countries. The author will be enabled to add the latest views and cases to his forthcoming work, or to discover where he has been anticipated by other writers."

An early crisis was announced at the end of Volume 6. "With this issue," reads the notice, "the *Index Medicus* will cease to be published." The publisher, Mr. Leypoldt, had died and the managers of his estate could not continue to support the losses that the publication of the *Index* had incurred from the start. "The time has come, therefore, when neither zealous friends nor generous publishers can be allowed to make further efforts or sacrifices, and the publication is discontinued. Whether it will, in some other shape, or under some other auspices, again appear, is for the future to decide." Happily another altruistic publisher was found promptly, and *Index Medicus* continued without missing a volume.

Dr. Billings had founded well, and the *Index Medicus* always received his support even while his energies were otherwise directed. The range of his activities, both during his tenure as head of the Library and after his retirement from the Army in 1895, was phenomenal. They encompassed not only the operation of the

Fielding H. Garrison, M.D.

Robert Fletcher, M.D.

Library but also aspects of the 10th Census (1880), assisting the organizers to staff the new Johns Hopkins Medical School and hospital and designing the hospital buildings, the organization and direction of the New York Public Library, and chairmanship of the Board of Trustees of the Carnegie Institution.

From the beginning, a large part of the responsibility and credit for implementing Dr. Billings' idea was shared by his colleague and successor, Dr. Robert Fletcher, who carried on the work, with a minor interruption, from 1879 until his retirement in 1912 at age 89. He in turn was succeeded by Dr. Fielding Garrison who had earned a medical degree after joining the library staff in 1891, and had become Associate Editor in 1903. Dr. Garrison remained editor until the merger of *Index Medicus* with the Quarterly Cumulative Index in 1927. In addition to his editorial duties, he is renowned for his authorship of many historical papers and for his classic "An Introduction to the History of Medicine."

Although the *Index Medicus* underwent changes in title and frequency of issue, its publication over the past century was sustained without interruption. The Library has always been involved in indexing the literature, even when the expenses of publishing have been borne by others. Among these were private companies (F. Leypoldt, 1879-1884, George S. Davis, 1885-1894, and Rockwell and Churchill, 1895-1899); the Institute of Bibliography in Paris (1900-1902); the Carnegie Institution (1903-1926); and the American Medical Association (1927-1959).

In 1960, the National Library of Medicine (the direct organizational descendant of the Library of the Surgeon General) resumed publishing *Index Medicus* monthly under its original title, and its printing and distribution have been handled by the U.S. Government Printing Office. Also since 1960 there has been published an annual cumulation known as *Cumulated Index Medicus*. The first four annual volumes were published by the American Medical Association; since 1964 it has been published by the National Library of Medicine (NLM).

In 1960, the same year NLM resumed responsibility for publishing *Index Medicus*, the Library wrote specifications for a computerized system to aid in its preparation. Not only did the new system facilitate an improved and more timely *Index Medicus*, but it and its successors have made possible the publication of a wide variety of specialized bibliographies and permitted individual searches of the entire database of *Index Medicus* references.

Since 1970, searching of NLM's computerized bibliographic databases has been possible from remote locations. The number and size of these databases have increased, as has the ease with which they may be searched. Over forty thousand institutions and individuals now have access to these services.

John Shaw Billings, seeking to improve medical communication, relied on the printed word as the most available means toward that end. As *Index Medicus* begins its second century, NLM continues to seek new ways to foster professional communication among those in the health community, but for the foreseeable future *Index Medicus* will play an essential role in that effort.

INDEX MEDICUS CITATION FORMAT

Since 1980, the format for journal article citations used in *Index Medicus* has conformed to American National Standard for Bibliographic References Z39.29-1977. This national standard was developed and is maintained by the National Information Standards Organization (NISO, Z39, formerly named American National Standards Committee Z39) which is accredited by the American National Standards Institute to develop consensus standards for libraries, information science, and publishing. Over sixty organizations representing the leading national libraries, information organizations, and publishers in the U.S. participate in the review and development of NISO standards. Efforts to encourage wide use of the standard forms by medical publications are well advanced. [1-5]

The *American National Standard for Bibliographic References Z39.29-1977* is available for purchase from the American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018. Any comments or questions on the standard should be directed to the developer of Z39.29-1977: National Information Standards Organization, National Institute of Standards and Technology, Administration 101, RM E-106, Gaithersburg, MD 20899.

MATERIALS INDEXED

Index Medicus contains citations to the biomedical journal literature.

In the selection of materials for indexing, the National Library of Medicine (NLM) is advised by a chartered committee of distinguished physicians, medical editors, and medical librarians. This group, the Literature Selection Technical Review Committee (LSTRC), meets several times a year to review new titles, and periodically to examine the coverage in various subject fields. The Library indexes the literature that has been judged most useful to *Index Medicus* users, but it is not possible to include every journal that might contain useful articles.

An effort is made to maintain a reasonable balance of subject matter. The inclusion of a journal should not be construed as indicating that it is considered superior to one that is not indexed. The omission of a publication does not necessarily reflect on its quality.

Original journal articles are indexed, as well as those letters, editorials, biographies, and obituaries that have substantive contents. In certain journals which cover fields other than biomedicine, only those articles related to biomedicine are selected for inclusion in *Index Medicus*.

Some journals that are published in a foreign language are also published in English translation, but *Index Medicus* cites only one source. This is almost invariably the original foreign language publication because it is available earlier and is the ultimate source of information concerning the author's intent. For up-to-date information about the availability of English translation journals, particularly Consultants Bureau translations of Soviet journals, a medical librarian should be consulted.

A few medical journals publish several editions, intended for different countries or different groups of readers. *Index Medicus* cites only one edition – usually the one that is most widely distributed in the United States. Although the editors of some of these journals assure that the citation for the edition that is indexed is correct for all other editions, there are other journals for which this is not true. For this reason, the page and issue numbers included in the *Index Medicus* citations may not be helpful to the readers of variant editions of such journals.

Currently, the journal title abbreviations used in *Index Medicus* are formulated according to the rules of the American National Standard for Information Sciences—Abbreviation of Titles of Publications, ANSI Z39.5-1985,[1] except for the treatment of part or section designations and the omission of special characters and symbols and hyphens in compound words. Title abbreviations formulated under earlier guidelines have been retained in a few cases.

For the abbreviation of any specific journal cited in *Index Medicus*, see the *List of Journals Indexed in Index Medicus (LJI)* which is provided with the January issue of *Index Medicus* and in the annual cumulation. The *LJI* is also available separately from the Government Printing Office (see the list of National Library of Medicine publications inside the front cover of *Index Medicus*.)

THE INDEXING OPERATION

Materials selected for inclusion are indexed by highly trained literature analysts. The content of each piece is described by assigning terms selected from *Medical Subject Headings (MeSH)*, the Library's controlled vocabulary of technical terms, consisting of an alphabetic list of headings as well as hierarchical tree structures. *MeSH*® is published as a supplement to *Index Medicus* and appears with the January issue; it is reproduced in its entirety in *Cumulated Index Medicus*. Additional copies of *MeSH* may be purchased from the Government Printing Office (see the list of NLM publications inside the front cover of *Index Medicus*.)

In indexing, the analyst assigns as many subject headings as are necessary to describe adequately the content of each article. Each journal article is cited in *Index Medicus* under only those subject headings which represent the most important concepts of the article. All subject headings, including those representing more peripheral concepts are stored in MEDLINE®, the Library's computer-based file of citations, for use in machine retrieval.

In *Index Medicus*, citations are published only under terms appearing in *MeSH*. If the medical concept sought is not a main heading in *MeSH*, the MeSH equivalent must be found. For example, citations on German measles would appear in *Index Medicus* under its MeSH equivalent, RUBELLA. Many MeSH equivalents are printed in *MeSH* and *Index Medicus* as *see* references. When materials are indexed for *Index Medicus*, the most specific terms available in *MeSH* are used. Thus, if an article were concerned with erythromycin, it would be indexed under that term, rather than the broader ANTIBIOTICS. Under the latter term, one would find only: (a) articles dealing with antibiotics generally; (b) those that deal in a very general way with a large number of named antibiotics; and (c) those that deal with specific antibiotics which have not been separately listed in *MeSH*.

The user who is interested in one concept may find that the broader term is also worth examining for articles of possible interest. Although one may be interested primarily in penicillin sensitivity, reports on the general subject of antibiotic sensitivity may be useful. The user who wants information on some aspect of the use of antibiotics in pediatric practice would certainly want not only the general materials that would appear under ANTIBIOTICS, but also those concerned with specific antibiotics.

Because it is impossible to group together all terms directly or indirectly related to a particular concept, the following should be considered when searching this bibliography:

1. Direct form of a term (LUNG ABSCESS)
2. Inverted form of a term (ANEMIA, HEMOLYTIC)
3. Noun form (LIVER, KIDNEY, BRAIN)
4. Adjective form (HEPATIC COMA, CEREBRAL REVASCULARIZATION)

[1]American National Standards Institute. American National Standard for Information Sciences—Abbreviation of Titles of Publications, 1985.

5. Function words which imply the concept in mind (THINKING for BRAIN, DIGESTION for DIGESTIVE SYSTEM)

6. Terms for techniques which imply the concept in mind (ELECTROCARDIOGRAPHY for HEART)

7. Synonyms or near-synonyms (JOHNE'S DISEASE see PARATUBERCULOSIS)

8. Broader and narrower terms

The best way to find broader and narrower terms is by reference to the *MeSH Tree Structures* where terms are grouped into fifteen subject categories and arranged in a hierarchical manner with specific terms indented under the more general one. For example, in subcategory D20, under ANTIBIOTICS, many types of antibiotics, such as ANTIBIOTICS, ANTINEOPLASTIC are listed. Indented under that term are several even more specific terms. Thus, broader or narrower terms may be found merely by scanning these hierarchical lists.

The *Index Medicus* user generally starts with one or more medical terms in mind which express his or her own subject interest. If the user does not find a given term in the alphabetical list, examination of an appropriate "tree structure" may reveal a broader or more specific term under which the desired literature might have been indexed. When a usable term is found, examination of nearby entries in the alphabetic list may reveal related terms that are also worth searching in the *Index Medicus* Subject Section.

A system of 80 topical subheadings is available to subdivide the *MeSH* subject headings used in indexing each article. They afford a convenient means of grouping together those citations which pertain to a particular aspect of a subject. Of course, not every subheading is suitable for use with every subject heading. A given subheading is used only with certain subject headings, as listed in the Introduction of *Medical Subject Headings*. Two examples of subheadings are:

(1) "anatomy & histology"—used with organs, regions, and tissues for normal descriptive anatomy and histology; used for normal anatomy and structure of animals and plants.

(2) "diagnostic use"—used with chemical compounds, drugs and physical agents when used for studies of clinical function of an organ, or for the diagnosis of human or animal diseases.

SUBJECT HEADING CHANGES

MeSH is revised and updated each year. A copy is distributed with the January issue of *Index Medicus*, and is also included in the first part of each *Cumulated Index Medicus*. It should be available to every *Index Medicus* user.

A given volume of *Index Medicus* contains only the subject headings for which there are appropriate citations in that volume—and cross-references to those subject headings. *MeSH* contains an alphabetic list of all allowable subject headings and cross-references, including those which may not be represented by citations in any given volume of *Index Medicus*.

Beginning in January 1991, the use of *see under* cross-references for *MeSH* and *Index Medicus* is discontinued. Only the *see* cross-references used for synonymous or near-synonymous forms for a heading remain. All *see under* cross-references have been elevated to full-fledged subject headings and citations may now be found under these entries when appropriate.

Annually new subject headings are added and old ones deleted. The additions serve to provide logical places to look for newly emerging concepts, or they provide more specificity in expanding subject fields. In some cases they may replace older, less currently acceptable terminology for established concepts. Subject headings are deleted if they are concerned with subjects that are so rarely written about that they no longer merit a separate heading, or if they have been replaced by more up-to-date headings.

All additions and deletions are listed in the Introduction of *Medical Subject Headings* and in Book 1 of *Cumulated Index Medicus*.

In the annual *MeSH* revisions, the Library attempts to maintain a balance between flexibility and stability. Although it is preferable to have a dynamic thesaurus responsive to current changes in terminology as reflected in the indexed literature, the Library is aware that changes create problems for those who follow a subject in *Index Medicus* from year to year and for the many medical libraries that use *MeSH* subject headings in their catalogs. There is, therefore, a reluctance to introduce headings that offer only slight improvement or represent transient interests. There is also an effort to avoid fine distinctions that may be understood by only a limited group of users within a given subject field.

The Library's subject headings tend to follow—rather than anticipate—the usage in the literature. When possible, preference is given to terminology that has the support of major professional organizations, with the realization that few such authorities attain universal acceptance.

ARRANGEMENT

Subject Section

Each article cited in *Index Medicus* is printed under one or more subject headings, and the entry appears in full under each.

Journal Articles:

Each entry contains the following elements, in order: original English title of article, or English translation of title in brackets; first author (if more than one) or sole author; journal title abbreviation; date of issue; volume number; issue, part or supplement; inclusive pagination; the notation Eng. Abstr. for those non-English articles which provide an abstract in English; and an abbreviation indicating the language of the article if other than English. For the names of as many as ten authors in a citation, refer to the Author Section. The journal title abbreviation is in bold-face type; the full journal title may be found in the *List of Journals Indexed in Index Medicus*.

Examples of typical journal article citations:

> An ultrastructural study of mast cells in the alveolar wall of normal and asthmatic lung. Warton A, et al.
> **Aust J Exp Biol Med Sci** 1986 Oct;64(Pt 5): 435-44

cited under ASTHMA/PATHOLOGY; MAST CELLS/ULTRASTRUCTURE; and PULMONARY ALVEOLI/PATHOLOGY.

Comparative haemodynamic effects of intravenous lignocaine, disopyramide and flecainide in uncomplicated acute myocardial infarction. Silke B, et al.
Br J Clin Pharmacol 1986 Dec;22(6);707-14

cited under DISOPYRAMIDE/THERAPEUTIC USE; FLECAINIDE/THERAPEUTIC USE; LIDOCAINE/THERAPEUTIC USE; HEMODYNAMICS/DRUG EFFECTS; and MYOCARDIAL INFARCTION/DRUG THERAPY.

Order of Citations:

Citations listed in *Index Medicus* are arranged alphabetically by *MeSH* subject heading. Under each subject heading, the articles are grouped together in the following manner:

(1) general articles to which no subheading has been assigned;

(2) articles which are listed under the appropriate subheadings.

Under each subject heading or subheading, the entries are grouped according to the original language of the text, with the English-language items appearing first, followed by citations for works published in other languages, arranged alphabetically by language. Within each language group, the articles are alphabetically ordered by journal title abbreviation.

Overall Citations:

When an issue of a serial contains a sequence of articles having a unifying theme, a citation may be created to lead readers to the sequence as a whole. These overall citations are made for proceedings of major national and international conferences and for abstracts of proceedings. The latter are labeled "Abstracts" in the title but are not indexed individually. No authors' names appear on overall citations.

Example of overall citation when individual articles are indexed:

Essential nutrients in carcinogenesis. **Adv Exp Med Biol** 1986;206:1-562

Examples of individual citations included within the above overall:

Epidemiologic studies of vitamins and cancer of the lung, esophagus, and cervix. Ziegler RG. **Adv Exp Med Biol** 1986;206:11-26

Selenium, vitamin E, fiber, and the incidence of human cancer: an epidemiologic perspective. Willett WC. **Adv Exp Med Biol** 1986;206:27-34

Modification of experimental colon carcinogenesis by dietary fibers. Jacobs LR. **Adv Exp Med Biol** 1986;206:105-18

Example of overall citation when individual items are abstracts:

Thirty-second annual meeting of the Health Physics Society. July 5-9, 1987, Salt Lake City, Utah. Abstracts. **Health Phys** 1987 Jul;52 Suppl 1:S1-87

Retractions:

When an article is retracted in the journal in which it was originally published, the retraction is cited under the heading RETRACTION OF PUBLICATION. Beginning with 1989 indexing, the original article is also amended – with the heading RETRACTED PUBLICATION.

Original article (RETRACTED PUBLICATION)

Altered calcitonin gene in a young patient with osteoporosis [retracted by Alevizaki M, Legon S. In: BMJ 1989 Jul 22;299(6693):235] Alevizaki M, et al. **BMJ** 1989 May 6;298(6682):1215-6

Retracting article (RETRACTION OF PUBLICATION)

Retraction in the light of new data [retraction of Alevizaki M, Stevenson JC, Girgis SI, MacIntyre I, Legon S. In: BMJ 1989 May 6;298(6682):1215-6] Alevizaki M, et al. **BMJ** 1989 Jul 22;299(6693):235

Errata:

When a published erratum is printed in a subsequent issue of the journal in which an article appeared originally, the citation is amended to include reference to the publisher's correction.

Syndrome of mitral valve prolapse: current perspectives [published erratum appears in Prog Cardiovasc Dis 1989 Sep-Oct;32(2):171] Ansari A. **Prog Cardiovasc Dis** 1989 Jul-Aug; 32(1):31-72

Commentary:

When comments on a published article appear in the same or a subsequent issue of the journal in which the paper originally appeared, both the original and the commenting citations are amended to indicate the presence of commentary.

Original article **(Comment in)**

Maternal-fetal transfer of thyroxine in congenital hypothyroidism due to a total organification defect or thyroid agenesis [see comments] Vulsma T, et al. **N Engl J Med** 1989 Jul 6;321(1):13-6. Comment in: N Engl J Med 1989 Jul 6; 321(1):44-6

Commenting article **(Comment on)**

Maternal thyroxine and congenital hypothyroidism [editorial; comment] Larsen PR. **N Engl J Med** 1989 Jul 6:321(1):44-6. Comment on: N Engl J Med 1989 Jul 6:321(1):13-6

Author Section

Author:

An Author Section citation may provide the names of as many as ten authors of an article. If an article has eleven or more authors, this is indicated by "et al." after the tenth author's name. Names from non-Roman alphabets are transliterated (see below under Title) and Chinese and Japanese names are given as shown in the journal. The complete citation is printed only under the first author's name; names of the second through the tenth author are cross-referenced to the full citation under the first author's name, thus:

Maeda T, Owada MK, Sugiyama H, Miyake S, Tani Y, Ogawa H, Oka Y, Komori T, Soma T, Kishimoto S, et al. Differentiation of an Abelson virus-transformed immature B precursor cell line under the expression of tyrosine kinase activity of v-abl oncogene product. Cell Differ 1987 Apr;20(4):263-9

Sugiyama H see **Maeda T**
Tani Y see **Maeda T**

Title:

The author is followed by the title of the article in the vernacular, and then the other bibliographic elements as they appear in the Subject Section (described above). The title of the article is supplied in brackets in translated form only (as in the Subject Section), and not in the vernacular, for citations in the following languages: Arabic, Armenian, Azerbaijani, Chinese, Georgian, Hebrew, Japanese, Korean, Persian, Pushto, Thai, and Vietnamese. Titles in the following languages are transliterated into Roman script: Bulgarian, Greek, Russian, Serbo-Croatian, and Ukrainian.

Example of title in the vernacular:

Colombo ML, Grillo C, Ricci BM, Erbeia M, Buschini MP. Valori sierici di rame nel neonato a termine e pretermine. Minerva Pediatr 1987 Feb 28;39(3-4):119-22 (Eng. Abstr.) **(Ita)**

Name of Individual as Subject:

Articles about individuals are cited in the Author Section with the subject's name enclosed in parentheses and preceding the other components of the entry. A separate entry is also provided under the name of the author in the usual manner. An anonymous biography or obituary will appear only under the subject's name.

Anonymous Non-English Citations:

A separate subsection is provided at the end of the Author Section for anonymous non-English language references. Special treatment is accorded the material in order to have an authentic reference to the work in the original language form. In this subsection, the journal article entries are arranged alphabetically under the journal title abbreviation.

Bibliography of Medical Reviews

From 1955 through 1987, the Library defined medical reviews as well-documented surveys of the recent biomedical literature. In response to user requests, the Library broadened this definition in 1988 to encompass reviews of current thinking on a given subject, regardless of the age of the literature cited, and to include categories of material previously excluded. Types of articles now considered to be reviews include academic, classical or exhaustive reviews; tutorial, didactic or subject reviews; multicase or epidemiologic reviews; consensus conferences; reviews of reported, known or published cases; and state-of-the-art reviews.

Materials with the following characteristics are *not* considered as reviews: case reports or original research articles containing a review of the literature as an adjunct; statistical and epidemiological surveys; bibliographies which comprise only a list of references; historical articles; monthly summaries of a subject area which appear as a regular feature in journals; and theses.

Citations to reviews are included in the "Bibliography of Medical Reviews" section of the monthly *Index Medicus* and *Cumulated Index Medicus*, as well as in the Subject Section and Author Section of each. In the latter sections, users can distinguish review articles from standard citations by the number of references shown in parentheses at the end of the source. "0 ref." indicates that the bibliographic references were not printed in the article.

ACCESS TO ARTICLES CITED

Users of *Index Medicus* who wish to consult articles are advised to use the following sources:
1. Reprints of articles: these are frequently available directly from the author or publisher.
2. Medical libraries: many will either have the material on hand, or know where it can be obtained through interlibrary loan.

INTERLIBRARY LOAN POLICY

Most of the literature in the collection of the National Library of Medicine (NLM), including that in the History of Medicine Division, is available for loan to any library, with the exception of indexes and abstracts, general library and information science materials, and current trade publications which are presumed to be widely available. Technical reports available from the National Technical Information Service and Government Printing Office publications are generally not lent. The Library lends only items that fall within the scope and coverage policy governing its collection. The scope of NLM's collection does not include patient or health education materials. Requests for reprints should be directed to the author.

Loans are not made directly to individuals. Requesters who cannot obtain medical literature in their Regions may secure material through the interlibrary loan service by requesting items through their local library. Libraries should send requests directly to NLM only for those titles not held in their Regions. Regional locator tools should be checked to determine locations. The Regional Medical Libraries (RMLs), listed in the following section, have established lending procedures for their Regions and have made available regional locator tools. As not all Regions have monograph and audiovisual locator tools, requests for these materials should follow existing Regional patterns. Libraries which are unable to fill requests may forward them to NLM.

Loans requested from NLM must comply with the instructions in this Policy and with the provisions of the National Interlibrary Loan Code of the American Library Association (ALA).

Forms of Loans

- Material will be lent in the original form, as a photocopy, as a telefacsimile, or in microfilm. The form will be determined by NLM.
- Journals and monographic serials generally do not circulate in their original form and photocopies are provided in lieu of lending the original. Photocopies will not exceed fifty pages, in most cases.
- Literature in the collection printed before 1914 is usually lent in the form of microfilm or photocopy. These materials are available from the History of Medicine Division (see address at the end of this section).
- Audiovisual titles are available for loan unless otherwise noted in NLM AV cataloging records.

Methods of Borrowing

- Requests will be accepted via the following methods: (1) DOCLINE, NLM's automated ILL request and referral system, (2) ALA or IFLA Interlibrary Loan Request Form, typed in triplicate, (3) telefacsimile (in duplicate; phone: (301) 496-2809), or (4) approved forms of electronic mail, including those which provide addressing messages to TWX or TELEX stations. Electronic mail requests can be accepted through the following systems:

System	NLM User Code
EASYLINK, TELEMAIL	710-824-9615
MCIMAIL	(NLM's TWX address)

- Requests for serial literature should be sent directly to NLM only when the requested material is not available in the requester's Region. The Statement "not available in Region" must appear on the interlibrary loan request. Requests without this statement will be rejected.
- Requests for material to be photocopied must include the applicable statement of conformance to either the U.S. Copyright Act of 1976 (CCL) or Copyright Guidelines (CCG). Requests for loans of audiovisuals must include the CCL statement. To facilitate processing, NLM prefers that requests for loans of originals also carry the statement.
- Requests must include the signature of the authorizing person at the borrowing library (if the form is sent by mail) or the authorizing person's name (if sent by electronic transmission).
- NLM requires that a requesting library include its LIBID (library identification) on each request, near the library's address. The LIBID is assigned by NLM to facilitate identification of the requesting library and may be obtained by contacting the appropriate Regional Medical Library.
- Each item or item segment (chapter, part of issue, etc.) must be requested separately.
- Advance booking of audiovisuals for a specific date is not possible. Requests are processed as they are received.
- Requests that do not comply with the above procedures may not be accepted.

Interlibrary Loan Requests

- Journal citations should include the name of the journal, date of issue, volume, author, title, and full pagination of the article.
- Book citations should include the full name of author, title, edition, publisher, place, and date of publication.
- Audiovisual citations should include the full title, institution or person responsible for the production, and parts of the audiovisual (e.g., slides/audiocassette/guide).
- Omission of any of the above citation elements could result in an unfilled request.
- Citations verified in NLM publications or NLM databases should include NLM call numbers when available. The call number is identified by 02NLM in the databases and recently printed catalogs and 04NLM or DNLM in catalogs printed before January 1983. Do not request Cataloging in Publication titles, identified by a (P) following the call number, or titles withdrawn from NLM's collection, marked WITHDRAWN in the call number.
- Give source of verification whenever possible. If known, state the specific NLM database containing the citation. Do not state "MEDLINE" if the citation was found, for example, in TOXLINE® or CANCERLINE®. If the available bibliographic resources have been exhausted, a notation to that effect and summary of sources searched should be furnished. Requests not verified or which do not contain the notation and summary of sources searched will receive limited searching, while verified requests will be searched more thoroughly.
- If a citation cannot be verified, give the bibliographic reference to its source, or if mailed, attach a photocopy of the citation.

- Complete address of the requesting library must appear on each request form.
- It is not possible for NLM to cancel a request once it is received.

Telefacsimile

- NLM will accept requests transmitted in duplicate by telefacsimile and will use telefacsimile to fill requests for documents needed on an *emergency basis*. To request fax transmission for emergency requests, requests must be submitted by telephone or by telefacsimile; EMERGENCY requirement should be indicated. During the hours the Library is open, these requests will be filled within 2 hours. If NLM is unable to fill the request, notification will be transmitted within 2 hours. There is an additional charge for this service. (See CHARGES.)
- Requests received via telefacsimile which are not indicated as emergency requests will be processed as regular interlibrary loan requests.

Referrals

- NLM will refer requests which are within the scope of the NLM collection, are not available at NLM, and are identified as held by another library. At this time, NLM is referring to the Resource and Area Libraries in the RML Network, the British Library Document Supply Centre, National Agricultural Library, American Hospital Association, the American Dental Association and the American Journal of Nursing Company. If you wish this service, indicate "Refer on" at the top of the ALA form or in the comments field on an electronically transmitted request.

Titles in NLM Databases Not in the NLM Collection

- POPLINE, HEALTH, and several "Special List" indexes (e.g., dental and nursing) include some serials that are not in the NLM collection. SERLINE® indicates those titles by: (1) a note that they are not in the NLM collection, and (2) the indexing source rather than the call number. TOXLINE®, BIOETHICSLINE®, and several other databases also contain citations to titles not owned by NLM. Requests for photocopies from these titles are referred to a library holding these materials if the requesting library has indicated "Refer On" on the request.

Loan Period

- The loan period for original material, microfilm and audiovisuals is four weeks, including transit time.
- No renewals are granted.
- Libraries with overdue items may have their borrowing privileges suspended.

Delivery and Returns

- NLM will pay postage for outgoing loans.
- The borrowing library:
  —will pay postage for the return of borrowed materials;
  —is responsible for material from time of receipt until returned and received at NLM;
  —will replace materials lost or irreparably damaged. If materials cannot be replaced, a standard $75 fee will be charged ($150 for audiovisual materials).
- For the protection of the borrowing library, it is suggested that materials be insured or registered and that a return receipt be requested.
- Address all returns to the Collection Access Section. Audiovisual materials should be marked "audiovisuals."
- Pack materials properly for return. Protect corners and edges of books well and mail unbound materials flat. Audiovisual materials should not be returned in fiber jiffy bags.

Requests From Foreign Countries

- Interlibrary loan service for photocopies of journal articles will be provided under the same conditions and regulations as for U.S. libraries except for the difference in fee charged (see CHARGES).
- Materials in the original form will not be loaned outside the U.S.

Charges

- U.S. libraries—$7.00 for each filled interlibrary loan in the form of a photocopy or loan of a book, audiovisual, or microfilm.
- There is a $3.00 surcharge for photocopies provided via telefacsimile.
- Foreign libraries—$9.00 (U.S.) for each filled interlibrary loan in the form of a photocopy.
- Fees include charges for handling and postage.
- Federal libraries—NLM will provide service free of charge if the requesting library has complied with RML policy for routing of interlibrary loan requests. Federal libraries in the Greater Washington Metropolitan area may send requests directly to NLM.
- Do not send payment with the loan request. Invoices will be issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161 and are payable to NTIS. Libraries are encouraged to establish a deposit account with NTIS to facilitate payment. Coupons are not accepted as payment for these charges.
- Please keep a copy of each loan request form which is stamped with an NLM control number (e.g., KYB-8511051211, KYB-9101051211) and returned with each item. This number appears on the summary page of the invoice and is useful in interpreting the invoice charges.

Special Photographic Services

- Photographs or slides of portraits, halftones, photographs, prints, charts, and other pictorial work: special procedures are required. Write to the History of Medicine Division, Prints and Photographs Collection for cost estimate.

PREFACE

The 1990 issue of *Medical Subject Headings (MeSH®)* is presented as the primary listing of subject descriptors which appear in *Index Medicus®*.

As in previous years, citations will be found in *Index Medicus* only under those subject headings that appear in large type in this version of *MeSH*. However, terms which are "see under" cross-references in *Index Medicus* can be searched as separate headings in the MEDLINE® computer files.

Health science users who have direct online access to the MEDLINE data base will find the annotated version of *MeSH* better suited to their needs. The annotated *MeSH* contains geographic headings, "check tags," such as male, female, and human, and other data elements that are of value to the MEDLINE searcher, but are not used in *Index Medicus*. The *Medical Subject Headings Annotated Alphabetic List* is available through the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161

The Library is grateful to the many scientists who have commented on various terms in *MeSH* and have made suggestions for its improvement. They thus assist the Library in its efforts to keep abreast of knowledge in the expanding fields of the health sciences.

MeSH INTRODUCTION

The 1990 *MeSH* is the current authority list for the subject analysis of biomedical literature at the National Library of Medicine. It presents the subject headings under which all citations will appear in *Index Medicus*, serves as the basis for search formulations in retrieval of bibliographic citations stored in the MEDLARS® (Medical Literature Analysis and Retrieval System) computer files, and is the standard subject heading list for the cataloging of books and audiovisuals in the Library. This edition of *MeSH* is designed particularly for the needs of *Index Medicus* users. Also included is introductory material of special interest to medical librarians.

Medical Subject Headings is divided into two sections: Alphabetic List and Tree Structures.

ALPHABETIC LIST

The Alphabetic List section contains the subject headings arranged in alphabetic order with cross-references.

In selecting terms as subject headings, the most commonly used forms of English expressions are generally preferred. The *MeSH* user must also consider various related expressions. Thus, a user who is interested in lungs may also wish to consider looking for terms containing the word roots pulmo- and pneumo-; in kidney, renal and nephr-.

The subject headings have been constructed primarily for the convenience of the user of *Index Medicus*. Therefore, direct natural-language sequence is not always used. When a group of terms share a basic concept, they are arranged alphabetically under that concept and not scattered throughout the alphabet. For example, tuberculosis in its various forms and relationships is expressed by a series of headings starting with TUBERCULOSIS (TUBERCULOSIS, AVIAN; TUBERCULOSIS, BOVINE; TUBERCULOSIS, CARDIOVASCULAR).

Criteria for selection of subject headings include frequency of term usage in the medical literature; recognition of need for the concept by various users of *MeSH*; recommendation by advisory panels on terminology; and the extent to which the concept is relatively clear and precise.

Citations will be found in *Index Medicus* only under the *MeSH* headings that appear in large type. All other entries in the Alphabetic List are cross-references, leading the user, directly or indirectly, to appropriate *Index Medicus* headings.

Cross-references are of several kinds:

Referring to another term	Corresponding "referred from" designation
see	X
see under	XU
see related	XR

For example:

LUTEINIZING HORMONE see LH

LH
X LUTEINIZING HORMONE

"See under" is used to refer from a specific term that does not appear as an *Index Medicus* heading to a more general term which does. For example, the reference "LEVOCARDIA see under HEART DEFECTS, CONGENITAL" means that articles pertaining to Levocardia will be found under HEART DEFECTS, CONGENITAL in *Index Medicus*. However, the user may directly search online databases such as MEDLINE for LEVOCARDIA and all "see under" cross-references.

The "see" cross-references were originally conceived of as synonyms for the headings to which they referred. However, we now have in *MeSH* a number of see cross-references that cannot be considered synonyms of headings yet do not merit the status of main heading or even a "see under" cross-reference. For example, CADUCEUS is a "see" cross-reference to the more general heading EMBLEMS AND INSIGNIA.

Also, a "see" reference may sometimes refer the user to a "see under" reference, rather than directly to a heading that appears in *Index Medicus*.

For this reason, the user of *MeSH* should always consult *MeSH* for the term to which the "see" refers before looking for citations in *Index Medicus*. Thus, *MeSH* indicates: "ORNITHINE VASOPRESSIN see ORNIPRESSIN," but ORNIPRESSIN is not a heading under which citations may appear in *Index Medicus*. If ORNIPRESSIN is searched in *MeSH*, the user finds "ORNIPRESSIN see under VASOPRESSINS." VASOPRESSINS is the heading under which any *Index Medicus* citations concerning ornithine vasopressin will be found. These double references have arisen because of certain *MeSH* changes that were instituted to improve the MEDLINE computer search capabilities.

The "see related" reference is used primarily to indicate related headings not occurring in the same subcategory of the MeSH Tree Structures (see below). These headings may refer the user to citations related to the area of interest. However, the most obvious cross-references, such as those from an organ to its diseases, are avoided.

A heading may be followed by a history note. The note begins with the year the heading entered the system as an *Index Medicus* heading, unless the heading has been in use continuously since 1963. If there is more than one date, the first date given is the year of re-entry of a heading that had previously been deleted from the system. Where necessary, a range of dates is given.

The history note also traces changes in the heading and its cross-references. The kinds of headings with history notes include: 1) headings that existed previously as "see" or "see under" cross-references; 2) headings that existed previously in a different form (spelled differently, inverted, formerly singular, etc.); 3) headings now having "see" or "see under" cross-references (shown under the heading following X or XU, respectively) that existed previously as headings themselves or as cross-references to a different heading.

Example of a heading with history note:

ADRENAL CORTEX
78,63-67; was see under ADRENAL GLANDS 1968-77

The history note means that citations to articles on the adrenal cortex may be found in *Index Medicus* under ADRENAL CORTEX since 1978 and from 1963 through 1967; from 1968 through 1977 citations may be found under ADRENAL GLANDS.

History notes pertaining to cross-reference changes always appear with the heading to which they refer. For example, the history note for "FELINE CALICIVIRUSES see CALICIVIRIDAE" is as follows:

CALICIVIRIDAE
82; was CALICIVIRUSES 1979-81;
FELINE CALICIVIRUS was see under PICORNAVIRUSES 1975-78
X FELINE CALICIVIRUSES

Each heading is followed by one or more alphanumeric expressions (tree numbers) that direct the user to the place or places in the Tree Structures where the term is to be found. A plus sign following a tree number in the Alphabetic List indicates there are indented terms in the Tree Structures at that number. As explained under TREE STRUCTURES below, an indented term followed by an asterisk in the trees is a "see under" cross-reference in the Alphabetic List and therefore not an *Index Medicus* heading.

Headings may be subdivided by subheadings. These are discussed under SUBHEADINGS at the end of this section.

TREE STRUCTURES

The "trees" are lists in which the subject headings are divided into categories such as Anatomy (Category A), Organisms (Category B), etc. Most categories are further divided into subcategories, each of which is identified by an alphanumeric designation. Thus, B1 includes Invertebrates, B2 includes Vertebrates, etc. The *MeSH* terms in each subcategory are arranged hierarchically, in up to seven levels, from the most general to the most specific. Because of the branching structure of the hierarchies, these lists are sometimes referred to as "trees". Each *MeSH* term appears in at least one place in the trees, and may appear in as many additional places as may be logically appropriate.

Although National Library of Medicine staff have consulted numerous recognized sources in the process of developing the trees, these trees should not be regarded as representing an authoritative subject classification system. These are rather arrangements of terms for the guidance and convenience of persons who are assigning subject headings to or searching for literature in *Index Medicus* and in other National Library of Medicine products and databases. The trees are not an exhaustive classification of the subject matter but

contain only those terms that have been selected for inclusion in this thesaurus. Their structure frequently represents a compromise among the views and needs of particular disciplines and users, in the absence of any single universally accepted arrangement.

Those who index articles for inclusion in MEDLARS are instructed to find and use the most specific *MeSH* term that is available to represent each indexable concept. For example, articles concerning streptomycin will be found under the heading STREPTOMYCIN rather than the broader term ANTIBIOTICS, while an article referring to a new agent which is not yet in the vocabulary will be listed directly under ANTIBIOTICS. Accordingly, the user of *Index Medicus* may consult the trees to find additional subject headings which are more specific than a given heading, and broader headings as well. For example, under ABNORMALITIES one can find specific abnormalities:

ABNORMALITIES	C16.131
ABNORMALITIES, DRUG-INDUCED	C16.131.42
ABNORMALITIES, MULTIPLE	C16.131.77
BASAL CELL NEVUS SYNDROME	C16.131.77.130
BECKWITH-WIEDEMANN SYNDROME	C16.131.77.133

In the trees, each term is followed by the number that indicates its tree location. It may also be followed by one or more additional numbers, in smaller type, and truncated at the third level, indicating other tree locations of the same term. The numbers serve only to locate the terms in each tree and to alphabetize those at a given tree level. They have no intrinsic significance; e.g., the fact that D12.775.641 and D12.644.641 both have the three digit group 641 does not imply any common characteristic.

Terms that are "see under" references in the Alphabetic List appear in the trees and are indicated by an asterisk. A user must bear in mind that citations concerned with these concepts do not appear in *Index Medicus* under these headings. However, citations may be sought under these terms in MEDLINE, the National Library of Medicine's computerized online citation retrieval system, and in some specialized MEDLARS recurring bibliographies. These terms are sometimes referred to as "minor descriptors."

If a concept is represented in *MeSH* by a "see under" cross-reference, citations concerned with that concept will be found in *Index Medicus* under the heading indicated by the cross-reference, and not necessarily under headings suggested by other tree locations. For example, the alphabetic list contains the reference "SILO FILLER'S DISEASE see under LUNG DISEASES." This means that the citations for SILO FILLER'S DISEASE are found only under LUNG DISEASES, despite the fact that in the Tree Structures SILO FILLER'S DISEASE has a tree number for AGRICULTURAL WORKERS' DISEASES as well as for LUNG DISEASES. Although citations concerning silo filler's disease may indeed be of interest to a person who is concerned with agricultural workers' diseases, the articles about silo filler's disease are cited in *Index Medicus* under the heading LUNG DISEASES, as indicated by the cross-reference.

The trees also contain some terms that are followed by the designation (NON MeSH). These are included for the purpose of indicating the logical structure and have no other function for *Index Medicus* users. NON MeSH terms are never used for indexing, and are not in the Alphabetic List. The trees also contain geographic headings (Category Z), which also do not appear in the Alphabetic List. These terms are not *Index Medicus* headings but may be used in searching MEDLINE.

Because this edition of *MeSH* is designed for users of *Index Medicus*, information used primarily in indexing, cataloging, and MEDLINE searching has been omitted. For these purposes, use of *Medical Subject Headings Annotated Alphabetic List, 1990* is recommended. This is available from:

NEW HEADINGS & DELETIONS

Lists are provided of (a) new headings which have been introduced with 1990 *MeSH*, together with the headings under which these concepts were previously indexed; (b) headings which have been deleted, with the subject headings that have replaced them; and (c) new headings, listed by previous headings under which they were indexed.

SUBHEADINGS

There are 77 topical subheadings used for indexing in conjunction with subject headings. Subheadings afford a convenient means of grouping together those citations which are concerned with a particular aspect of a subject. Of course, not every subheading is suitable for use with every subject heading. In the following subheadings, the heading categories in parentheses are to be used as a general guide to the descriptors permitted with the subheading. Most of the headings in a given subcategory are permitted but there may exceptions and there may be a few headings in subcategories not listed which are permitted with the heading. For more specific information on subheadings allowed with a given heading consult the annotation for the heading in *Medical Subject Headings Annotated Alphabetic List, 1990.*

abnormalities (A1-10, A13-14, B2) - Used with organs for congenital defects producing changes in the morphology of the organ; used also for abnormalities in animals.

administration & dosage (D) - Used with drugs for dosage forms, routes of administration, frequency and duration of administration, quantity of medication, and the effects of these factors.

adverse effects (D, E1-4, E6-7) - Used with drugs, chemicals, or biological agents in accepted dosage - or with physical agents or manufactured products in normal usage - when intended for diagnostic, therapeutic, prophylactic, or anesthetic purposes. Used also for adverse effects or complications of diagnostic, therapeutic, prophylactic, anesthetic, surgical, or other procedures.

analogs & derivatives (D3-5, D7, D9, D11, D14-18, D20-23) - Used with drugs and chemicals for substances that share the same parent molecule or have similar electronic structure but differ by the addition or substitution of other atoms or molecules. Used when the specific chemical heading is not available, and no appropriate group heading exists.

analysis (A2-16, B1, B3-6, C4, D1, D3-5, D7-9, D11, D14-23, D25-26) - Used for the identification or quantitative determination of a substance or its constituents and metabolites; includes the chemical analysis of tissues, tumors, body fluids, organisms, plants, air, water, or other environmental carrier. Applies to both methodology and results. For analysis of substances in blood, cerebrospinal fluid, and urine the specific subheading designating the fluid is used.

anatomy & histology (A1-10, A13-14, B1-2, B6) - Used with organs, regions, and tissues for normal descriptive anatomy and histology; used for normal anatomy and structure of animals and plants.

antagonists & inhibitors (D2-24) - Used with chemicals, drugs, and endogenous substances to indicate substances or agents which counteract their biological effects by any mechanism. biosynthesis (D8, D11-13, D24) - Used for the formation of chemical substances in organisms, in living cells, or by subcellular fractions.

blood (B2, C, D1-24, F3) - Used for the presence or analysis of substances in the blood; also for examination of, or changes in, the blood in disease states. Excludes serodiagnosis, for which the subheading "diagnosis" is used, and serology, for which "immunology" is used.

blood supply (A1-6, A8-10, A13-14, C4) - Used for arterial, capillary, and venous systems of an organ or region whenever the specific heading for the vessel does not exist; includes blood flow through the organ.

cerebrospinal fluid (B2, C, D1-24, F3) - Used for the presence or analysis of substances in the cerebrospinal fluid; also for examination of or changes in cerebrospinal fluid in disease states.

chemical synthesis (D2-26) - Used for diseases, syndromes, congenital abnormalities, or symptoms caused by chemical compounds in man or animals.

classification (B, C, D, E1-4, E6-7, F3, G1-2, I2-3, J1, M1, N2-4) - Used for taxonomic or other systematic or hierarchical classification systems.

complications (C, F3) - Used with diseases to indicate conditions that co-exist or follow, i.e., co-existing diseases, complications, or sequelae.

congenital (C1-12, C14-15, C17, C19-23) - Used with disease headings to indicate those conditions existing at, and usually before, birth; excludes morphologic abnormalities and birth injuries, for which "abnormalities" and "injuries" are used.

cytology (A2-10, A12-16, B1, B3, B5-6) - Used for normal cellular morphology of unicellular and multicellular organisms.

deficiency (D8, D12-13, D24) - Used with endogenous and exogenous substances which are absent or in diminished amount relative to the normal requirement of an organism or a biologic system.

diagnosis (C, F3) - Used with diseases for all aspects of diagnosis, including examination, differential diagnosis, and prognosis; excludes mass screening for which "prevention & control" is used. The subheading "radiography" is used for radiographic diagnosis and the subheading "radionuclide imaging" for scintigraphic diagnosis.

diagnostic use (D) - Used with chemical compounds, drugs, and physical agents when used for studies of clinical function of an organ, or for the diagnosis of human or animal diseases.

diet therapy (C, F3) - Used with disease headings for dietary and nutritional management of the disease. Does not include vitamin or mineral supplements, for which "drug therapy" may be used.

drug effects (A2-16, B1, B3-6, D12, G4, G6-11) - Used with organs, regions, tissues, or organisms and physiological and psychological processes for the effects of drugs and chemicals.

drug therapy (C, F3) - Used with disease headings for the treatment of the disease by the administration of drugs, chemicals, and antibiotics. For diet therapy and radiotherapy, use specific subheadings. Excludes immunotherapy and treatment with biologicals for which "therapy" is used.

economics (C, E1-4, E6-7, F3, G1-2, I2-3, J1, N2-4) Used for the economic aspects of any subject, as well as for all aspects of financial management. Includes the raising or providing of funds.

education (G1-2, M1) - Used for education and training programs in various fields and disciplines, and for training groups of persons.

embryology (A1-10, A13-14, B1-2, B6, C) - Used with organs, regions, and animal headings for embryologic and fetal development; also used with diseases for embryologic factors contributing to postnatal disorders.

enzymology (A2-16, B1, B3-6, C, F3) - Used with organisms, except vertebrates, and with organs and tissues; also used with diseases for enzymes during the course of the disease. Excludes diagnostic enzyme tests, for which "diagnosis" is used.

epidemiology (C, F3) - Used with diseases for the distribution of disease, factors which cause disease, and the attributes of disease in defined populations; includes incidence, frequency, prevalence, endemic and epidemic outbreaks; also surveys and estimates of morbidity in geographic areas and in specified populations. Excludes mortality for which "mortality" is used.

ethnology (C1-21, C23, F3) - Used with diseases for ethnic or racial aspects, and with geographic headings to indicate the place of origin of a group of people.

etiology (C, F3) - Used with diseases for causative agents including microorganisms; includes environmental and social factors and personal habits as contributing factors; includes pathogenesis.

genetics (B, C, D8, D11-13, D24, F3, G4-5, G7-12) - Used for mechanisms of heredity and the genetics of organisms, for the genetic basis of normal and pathologic states, and for the genetic aspects of endogenous chemicals; includes biochemical and molecular influence on genetic material.

growth & development (A1-10, A13-14, B) - Used with microorganisms, plants, and the postnatal period of animals for growth and development; includes postnatal growth or development of organs or anatomical parts.

history (C, D, E1-4, E6-7, F3-4, G1-2, I2-3, J1, M1, N2-3) - Used for the historical aspects of any subject; includes brief historical notes. Excludes case histories.

immunology (A2-16, B, C, D1-24, F3, G4-5, G7, G9-12) - Used for immunologic studies of tissues, organs, microorganisms, fungi, viruses, and animals; includes immunologic aspects of diseases but not immunologic procedures used for diagnostic, preventive, or therapeutic purposes, for which "diagnosis", "prevention & control", or "therapy" are used. Also used for chemicals as antigens or haptens.

injuries (A1-10, A13-14, B2) - Used with anatomic headings for wounds and injuries. Excludes cell damage, for which "pathology" is used.

innervation (A1-5, A7, A9-10, A13-14) - Used with organs, regions, or tissues for their nerve supply.

instrumentation (E1-4, G1-2) - Used with diagnostic or therapeutic procedures, analytic technics, and specialties or disciplines, for the development or modification of apparatus, instruments, or equipment.

isolation & purification (B1, B3-5, D) - Used with bacteria, viruses, fungi, protozoa, and helminths for the obtaining of pure strains or for the demonstration of the presence of or identification of organisms by DNA analyses, immunologic, or other methods; includes culture technics. Also with biological substances and chemicals for the isolation and purification of the constituents.

legislation & jurisprudence (G1-2, I2-3, N2-4) - Used for laws, statutes, ordinances, or government regulations, as well as for legal controversy and court decisions.

manpower (G1-2, N2) - Used with disciplines and programs for the demand, supply, distribution, recruitment, and use of personnel.

metabolism (A2-16, B, C, D, F3) - Used with organs, cells and subcellular fractions, organisms and diseases for biochemical changes and metabolism; with drugs and chemicals for anabolic processes (conversion of small molecules into large) and catabolic changes (breakdown of complex molecules into simpler ones). For biosynthesis, enzymology, pharmacokinetics, and secretion use the specific subheadings.

methods (E1-4, G1-2, N2) - Used with technics, procedures, and programs for methods.

microbiology (A, B1-2, B6, C, F3) - Used with organs, animals and higher plants and with diseases for microbiologic studies. For parasites, "parasitology" is used.

mortality (C, E4, F3) - Used with diseases for mortality statistics, and with procedures for deaths resulting from the procedure.

nursing (C, E1-4, E6-7, F3) - Used with diseases for nursing care and technics in their management; includes the nursing role in diagnostic, therapeutic, and preventive procedures.

organization & administration (G1-2, N2-4) - Used for administrative structure and management.

parasitology (A, B1-2, B6, C, F3) - Used with animals, higher plants, organs, and diseases for parasitic factors; do not use if the parasitic involvement is implicit in the diagnosis.

pathogenicity (B1, B3-5) - Used with microorganisms, viruses, and parasites for studies of their ability to cause disease in man or animals.

pathology (A1-11, A13-16, C, F3) - Used for organ, tissue, or cell structure in disease states.

pharmacokinetics (D) - Used for the mechanism, dynamics, and kinetics of exogenous chemical and drug absorption, biotransformation, distribution, release, transport, uptake, and elimination as a function of dosage, extent, and rate of metabolic processes.

pharmacology (D) - Used with drugs and exogenously administered chemical substances for their effects on living tissues and organisms; includes acceleration and inhibition of physiological and biochemical processes and other pharmacologic mechanisms of action.

physiology (A, B, D8, D11-13, D24, G4-5, G7-12) - Used with organs, tissues, cells, and physiologic processes of unicellular and multicellular organisms for normal function; used also with biochemical substances, endogenously produced, for their physiologic role.

physiopathology (A1-10, A13-14, C, F3) - Used with organs and diseases for disordered function in disease states.

poisoning (D) - Used with drugs, chemicals, and industrial materials for human or animal poisoning, acute or chronic, whether the poisoning is accidental, occupational, suicidal, by medication error, or by environmental exposure.

prevention & control (C, F3) - Used with disease headings for increasing human or animal resistance against disease, (e.g., immunization); for control of transmission agents; for prevention and control of environmental hazards; for prevention and control of social factors leading to disease; includes preventive measures in individual cases.

psychology (C, E1-4, F3, I3) - Used with nonpsychiatric disease, technics, and named groups for psychologic, psychiatric, psychosomatic, psychosocial, behavioral, and emotional aspects, and with psychiatric disease for psychologic aspects.

radiation effects (A, B1, B3-6, D, G4-12) - Used for effects of ionizing and nonionizing radiation upon living organisms, organs and tissues, and their constituents, and upon physiologic processes; includes effect of irradiation on drugs and chemicals.

radiography (A, B2, C, F3) - Used with organs, regions, and diseases for x-ray examinations. Does not include radionuclide imaging for which "radionuclide imaging" is used.

radionuclide imaging (A, B2, C, F3) - Used for radionuclide imaging of any anatomical structure, or for the diagnosis of disease.

radiotherapy (C) - Used with disease headings for the therapeutic use of ionizing and nonionizing radiation; includes use of radioisotope therapy.

rehabilitation (C1-21, C23, E4, F3) - Used with diseases and surgical procedures for restoration of function of the individual.

secondary (C4) - Used to indicate the secondary location to which the neoplastic process has metastasized.

secretion (A2-16, C4, D8, D11-13, D24) - Used for the discharge across the cell membrane, into the intracellular space or ducts, of endogenous substances resulting from the activity of intact cells of glands, tissues, or organs.

standards (D, E1-4, E6-7, F4, G1-2, I2, J1, N2-4) - Used with facilities, personnel, and program headings for the development, testing, and application of standards of adequacy or acceptable performance; used with chemicals and drugs for standards of identification, quality, and potency; includes health or safety standards in industries and occupations.

statistics & numerical data (E1-4, E6-7, F4, G1-2, I2-3, M1, N2-4) - Used with non-disease headings for the expression of numerical values which describe particular sets or groups of data; excludes manpower distribution for which "manpower" is used; excludes supply or demand for which "supply & distribution" is used.

supply & distribution (D, E7, N2) - Used for the quantitative availability and distribution of material, equipment, health services, and facilities. Excludes food supply and water supply in industries and occupations.

surgery (A1-10, A13-14, B2, C, F3) - Used for operative procedures on organs, regions, or tissues in the treatment of diseases; includes tissue section by lasers. Excludes transplantation, for which "transplantation" is used.

therapeutic use (D) - Used with drugs, biological preparations, and physical agents for their use in the prophylaxis and treatment of disease; includes veterinary use.

therapy (C, F3) - Used with diseases for therapies except drug therapy, diet therapy, radiotherapy, and surgery, for which subheadings exist; also to be used for articles dealing with multiple therapies.

toxicity (D) - Used with drugs and chemicals for experimental human and animal studies of their ill effects; includes studies to determine the margin of safety or the reactions accompanying administration at various dose levels; used also for experimental studies of exposure to environmental agents.

transmission (C1-3, C22) - Used with diseases for studies of the modes of transmission.

transplantation (A2-3, A5-7, A9-11, A13-16) - Used with organs, tissues, or cells for transplantation from one site to another within the same subject, or from one subject to another of the same species or different species.

trends (E1-4, E6-7, G1-2, I2, N2-4) - Used for the manner in which a subject changes, qualitatively or quantitatively, with time, whether past, present, or future. Excludes discussions of the course of disease in particular patients.

ultrastructure (A2-11, A13-16, B1, B3-6, C4) - Used with tissues and cells (including neoplasms) and microorganisms for microanatomic structures, generally below the size visible by light microscopy.

urine (B2, C, D1-24, F3) - Used for the presence or analysis of substances in the urine; also for the examination of, or changes in, the urine in diseases.

utilization (E1-4, E6-7, N2-4) - Used with equipment, facilities, programs, services, and health personnel for discussions, usually with data, of how much they are used. Includes discussions of overuse and underuse.

veterinary (C1-21, C23, E1-4, E6-7) - Used for naturally occurring diseases in animals, or for diagnostic, preventive, or therapeutic procedures used in veterinary medicine.

USE OF MEDICAL SUBJECT HEADINGS FOR CURRENT CATALOG AND AUDIOVISUALS CATALOG

The National Library of Medicine uses *MeSH* as the authoritative source for cataloging books, serials, and audiovisual materials.

In addition to the topical subheadings used for indexing (listed in the previous section) catalogers may use the following topical subheadings with headings in categories C, E, F, and G:

in adolescence	in middle age
in adulthood	in old age
in infancy & childhood	in pregnancy

In cataloging, a *MeSH* heading may also be modified by form, geographic, and language subheadings. These are listed below. When more than one type of subheading is used with a heading, the subheadings are listed in a fixed order: topical, geographic, form, language. Geographic subdivision is always direct.

In some form subheadings that are hyphenated, the part of the subheading preceding the hyphen is used as a topical subheading. For example, a publication cataloged under PSYCHIATRY-periodicals-bibliography is a bibliography in form of the subject "periodicals in psychiatry."

Headings to be subdivided geographically are those for the specialties (e.g., MEDICINE, SCIENCE, DENTISTRY, etc.) and those that have the topical subheading "economics," "education," "history," "manpower," "mortality," "epidemiology," "prevention & control," "supply & distribution," or "utilization," or the form subheading "directories," "legislation," or "statistics." Directories of specialists in the field are given the specialty heading subdivided by the geographic subheading and the form subheading "directories." A history of the practice in one locality is given the specialty heading subdivided by "history" and the geographic subheading.

Additional headings that may be subdivided by place are annotated as such in *Medical Subject Headings Annotated Alphabetic List, 1989*. The annotated publication also contains scope notes for the form subheadings and other annotations used in cataloging.

NEW HEADINGS—1990

A new heading either represents a completely new concept - with no directly corresponding heading in 1989 *MeSH*, or it replaces a heading which was deleted for 1990. In either case the previously-indexed-under heading was used before 1990 to index material now covered by the new heading. The previously-indexed-under heading is followed by a date or range of dates as a guide to the period of time in which it was used for the concept in *Index Medicus*. Therefore, a previously-indexed-under heading may not be in current use but will apply to the dates given. Note, however, that the beginning date is often established by searching the online databases, and thus may be later than the time period for *Index Medicus*.

If a new heading replaces an existing heading, the new heading is following by an asterisk.

New Heading	*Previously-Indexed-Under Heading*
ABDOMINAL PAIN	ABDOMEN (66-89) PAIN (66-89)
ABSORPTIOMETRY, PHOTON	ABSORPTION (72-79) DENSITOMETRY (67-89) RADIONUCLIDE IMAGING (77-89) SPECTROPHOTOMETRY, ATOMIC ABSORPTION (74-82) TOMOGRAPHY, EMISSION COMPUTED (80-89)
ACANTHAMOEBA KERATITIS	AMEBIASIS (75-89) KERATITIS (75-89)
ACUPUNCTURE ANALGESIA	ACUPUNCTURE (72-89) ANALGESIA (72-89)
ACUPUNCTURE POINTS	ACUPUNCTURE (66-89)
ACUPUNCTURE THERAPY	ACUPUNCTURE (66-89)
ADMINISTRATION, INTRAVAGINAL	ADMINISTRATION, TOPICAL (74-89) VAGINA (66-86) VAGINAL CREAMS, FOAMS AND JELLIES (75-86)
AGORAPHOBIA	PHOBIAS (75-79) PHOBIC DISORDERS (80-89)
AIDS DEMENTIA COMPLEX	ACQUIRED IMMUNODEFICIENCY SYNDROME (83-89) DEMENTIA (83-89)
ALBENDAZOLE	ANTHELMINTICS (64-89) BENZIMIDAZOLES (64-89)
ALFENTANIL	FENTANYL/analogs & derivatives (66-89)
7-ALKOXYCOUMARIN O-DEALKYLASE	OXYGENASES (64-89)

New Heading	*Previously-Indexed-Under Heading*
ALMITRINE	ANALEPTICS (64-89) PIPERAZINES (64-89)
4-AMINOBENZOIC ACID	AMINOBENZOIC ACIDS (66-89)
2-AMINO-5-PHOSPHONOVALERATE	ANTICONVULSANTS (64-89) VALINE (64-74) VALINE/analogs & derivatives (75-89)
4-AMINOPYRIDINE	AMINOPYRIDINES (79-89) PYRIDINES (64-78)
ANAPHYLATOXINS	COMPLEMENT (68-76) PEPTIDE FRAGMENTS (74-76) PEPTIDES (66-89) specific complement (75-76)
ANGIOGRAPHY, DIGITAL SUBTRACTION	ANGIOGRAPHY (80-89) SUBTRACTION TECHNIC (80-89)
ANGIOPLASTY, TRANSLUMINAL, PERCUTANEOUS CORONARY	ANGIOPLASTY, TRANSLUMINAL (82-89) CORONARY DISEASE (80-89) CORONARY VESSELS (78-89) DILATATION (78-81) HEART CATHETERIZATION (76-81)
ANIRIDIA	CHROMOSOME ABERRATIONS (75-77) CHROMOSOME DELETION (78-89) IRIS/abnormalities (66-89)
ANISOCORIA	PUPIL (66-89) IRIS DISEASES (83-89)
ANISOMETROPIA	REFRACTIVE ERRORS (66-89)
ANTIBIOTICS, MACROLIDE	ANTIBIOTICS (64-89)
ANTIBODIES, ANTI-IDIOTYPIC*	ANTI-ANTIBODIES (67-89)
ANTIBODIES, ANTINUCLEAR*	ANTINUCLEAR FACTORS (70-89)
ANTIGENS, CD	ANTIGENS, DIFFERENTIATION (88-89) ANTIGENS, DIFFERENTIATION, T LYMPHOCYTE (88-89)
ANTIGENS, CD4	ANTIGENS, DIFFERENTIATION, T LYMPHOCYTE (88-89) ANTIGENS, SURFACE (79-87) RECEPTORS, ANTIGEN, T-CELL (80-89) RECEPTORS, VIRUS (79-89)
ANTIGENS, HETEROPHILE*	ANTIGENS, HETEROGENETIC (72-89)

New Heading	*Previously-Indexed-Under Heading*
ANTI-INFLAMMATORY AGENTS, GOLD	ANTI-INFLAMMATORY AGENTS (66-86) ANTI-INFLAMMATORY AGENTS, NON-STEROIDAL (87-89) GOLD (66-89)
APROTININ*	KALLIKREIN-TRYPSIN INACTIVATOR (66-89)
ARTHRITIS, GOUTY*	GOUTY ARTHRITIS (89)
ARTHRITIS, PSORIATIC	ARTHRITIS (66-89) PSORIASIS (66-89)

DENTAL IMPLANTS	DENTAL IMPLANTATION (66-89)
DEOXYADENOSINES*	DEOXYADENOSINE (73-89)
DEVELOPMENTAL BIOLOGY	CELL DIFFERENTIATION (68-89) EMBRYOLOGY (78-89) MODELS, BIOLOGIC (68-72)

New Heading	*Previously-Indexed-Under Heading*
DIDEOXYADENOSINE	DEOXYADENOSINE/analogs & derivatives (75-89) DIDEOXYNUCLEOSIDES (89)
DIDEOXYCYTIDINE	DEOXYCYTIDINE/analogs & derivatives (86-89) DIDEOXYNUCLEOSIDES (89)
DIDEOXYINOSINE	DIDEOXYNUCLEOSIDES (89) INOSINE/analogs & derivatives (87-89)
DIET RECORDS	DIET (66-89) NUTRITION SURVEYS (71-89)
DIET, MACROBIOTIC	DIET (86-89) DIET FADS (66-89)
DIFLUNISAL	SALICYLIC ACIDS (66-89)
24,25-DIHYDROXYVITAMIN D 3	DIHYDROXYCHOLECALCIFEROLS (83-89) HYDROXYCHOLECALCIFEROLS (75-82)
DIPHTHERIA-TETANUS-PERTUSSIS VACCINE	DIPHTHERIA TOXOID (64-89) PERTUSSIS VACCINE (64-89) TETANUS TOXOID (64-89)
DISCRIMINANT ANALYSIS	STATISTICS (66-89)
DOUBLE-BLIND METHOD	RESEARCH DESIGN (78-89)
DOWN-REGULATION (PHYSIOLOGY)	
DRAINAGE, POSTURAL	DRAINAGE (66-89) POSTURE (66-89)
DRUGS, INVESTIGATIONAL	CLINICAL TRIALS (80-89) DRUG EVALUATION (74-89) DRUGS (66-89)
DUPLICATE PUBLICATION	PUBLISHING (66-89)
ECTROMELIA, INFECTIOUS	POXVIRUS INFECTIONS (75-89)
EFFECT MODIFIERS (EPIDEMIOLOGY)	
EICOSANOIDS	ARACHIDONIC ACIDS (67-89) FATTY ACIDS, UNSATURATED (73-89) LEUKOTRIENES (89) PROSTAGLANDINS (66-89) THROMBOXANES (78-89)
EIF-1	PEPTIDE INITIATION FACTORS (78-89)
EIF-2	PEPTIDE INITIATION FACTORS (78-89)
ELECTRIC STIMULATION THERAPY*	ELECTROTHERAPY (66-89)
ELECTROACUPUNCTURE	ACUPUNCTURE (66-89)

New Heading	*Previously-Indexed-Under Heading*
ELECTROCARDIOGRAPHY, AMBULATORY	ELECTROCARDIOGRAPHY (66-89) MONITORING, PHYSIOLOGIC (78-89)
EMERGENCY SERVICES, PSYCHIATRIC	EMERGENCIES (66-75) EMERGENCY HEALTH SERVICES (68-75) MENTAL HEALTH SERVICES (76-89)
ENALAPRILAT	DIPEPTIDES (64-85) ENALAPRIL (86-89)
ENDOTHELIUM-DERIVED RELAXING FACTOR	BIOLOGICAL PRODUCTS (64-89) VASODILATOR AGENTS (64-89)
ENDOPHTHALMITIS*	OPHTHALMIA (66-89)
ENOPHTHALMOS	EYE DISEASES (67-89) ORBIT (66-89)
EPIDEMIOLOGIC FACTORS	EPIDEMIOLOGY (66-89)
EPITHELIOID CELLS	EPITHELIUM (66-89) MACROPHAGES (66-89)
ERGOCALCIFEROLS*	ERGOCALCIFEROL (67-89) VITAMIN D 2 (63-66)
ERYTHEMA CHRONICUM MIGRANS	ARTHRITIS, INFECTIOUS (84) BORRELIA (86-89) ERYTHEMA (66-87) LYME DISEASE (85-89) TICKS (83-89)
ERYTHROID PROGENITOR CELLS	ERYTHROCYTES (72-89) HEMATOPOIETIC STEM CELLS (77-89)
ERYTHROMYCIN ETHYLSUCCINATE	ERYTHROMYCIN (64-89)
ESOTROPIA	STRABISMUS (66-89)
ESTROGEN REPLACEMENT THERAPY	ESTROGENIC SUBSTANCES, CONJUGATED (66-89) ESTROGENS (66-89) ESTROGENS, SYNTHETIC (75-89) MENOPAUSE (66-89)
ETHMOID SINUSITIS	SINUSITIS (66-89)
ETHYLENE DIBROMIDE	HYDROCARBONS, BROMINATED (74-89)
EUTHANASIA, PASSIVE	ETHICS, MEDICAL (66-77) EUTHANASIA (66-89)
EXOSTOSES, MULTIPLE HEREDITARY*	EXOSTOSES, MULTIPLE (68-89)
EXOTROPIA	STRABISMUS (66-89)

New Heading	*Previously-Indexed-Under Heading*
EXTRAVASCULAR LUNG WATER	BODY WATER (74-89) EXTRACELLULAR SPACE (78-89) LUNG (69-89)

DELETED MEDICAL SUBJECT HEADINGS—1990

The following headings are no longer used as indexing terms. Material formerly indexed by the old heading will now be indexed by the replaced-by heading.

Deleted Heading	*Replaced-by Heading*
ANALGESICS, ANTI-INFLAMMATORY	ANTI-INFLAMMATORY AGENTS, NON-STEROIDAL
HEMERALOPIA	VISION DISORDERS
INCIDENCE STUDIES	COHORT STUDIES
LUMPY SKIN DISEASE	POXVIRUS INFECTIONS
PREVALENCE STUDIES	CROSS-SECTIONAL STUDIES
TUBERCULOSIS IN CHILDHOOD	TUBERCULOSIS, PULMONARY
YABA VIRUS	POXVIRIDAE

AMEBIASIS	ACANTHAMOEBA KERATITIS
AMIDINES	PENTAMIDINE
AMINOBENZOIC ACIDS	4-AMINOBENZOIC ACID
AMINOPYRIDINES	4-AMINOPYRIDINE
ANALEPTICS	ALMITRINE
ANALGESIA	ACUPUNCTURE ANALGESIA
ANALGESICS, ADDICTIVE	PROPOFOL
ANALYSIS OF VARIANCE	MULTIVARIATE ANALYSIS
ANDROGENS, SYNTHETIC	METRIBOLONE
ANESTHESIA, INHALATION	GAS SCAVENGERS
ANESTHETICS	PROPOFOL
ANGIOGRAPHY	ANGIOGRAPHY, DIGITAL SUBTRACTION
ANGIOPLASTY, TRANSLUMINAL	ANGIOPLASTY, TRANSLUMINAL, PERCUTANEOUS CORONARY
ANOXIA	CELL HYPOXIA
ANTHELMINTICS	ALBENDAZOLE
ANTI-ANTIBODIES	ANTIBODIES, ANTI-IDIOTYPIC*
ANTI-ARRHYTHMIA AGENTS	BEPRIDIL
ANTIBIOTICS	ANTIBIOTICS, MACROLIDE
ANTIBIOTICS, LACTAM	CARBAPENEMS
ANTIBODY-TOXIN CONJUGATES	IMMUNOTOXINS*
ANTICONVULSANTS	2-AMINO-5-PHOSPHONOVALERATE
ANTIGENS, DIFFERENTIATION	ANTIGENS, CD
ANTIGENS, DIFFERENTIATION	RECEPTORS, LEUKOCYTE-ADHESION
ANTIGENS, DIFFERENTIATION	RECEPTORS, VERY LATE ANTIGEN

NEW HEADINGS—BY PREVIOUS INDEXING—1990

To allow users to see the previously existing headings affected by new headings, the following list is alphabetically arranged by the 1989 headings which have been replaced or further subdivided by a new heading.

The existing heading is in the left column and the new heading is in the right. If a new heading is a one-to-one replacement of an existing heading, the new heading is followed by an asterisk.

EXAMPLES:

ENDOSCOPY	HYSTEROSCOPY

ENDOSCOPY remains as a heading, but the more specific heading HYSTEROSCOPY was introduced in 1990. Citations concerning HYSTEROSCOPY that previously would have been listed under ENDOSCOPY will no longer appear under that term but will be listed under the specific term HYSTEROSCOPY in the 1990 *Index Medicus*.

AORTOCORONARY BYPASS	CORONARY ARTERY BYPASS*

In 1989 citations on this concept appeared under AORTOCORONARY BYPASS. This term was replaced by CORONARY ARTERY BYPASS for 1990.
